ENTRY-LEVEL FRONTEND DEVELOPER

Motivated entry-level frontend developer with knowledge of HTML, CSS, JavaScript, and React seeking to use technical proficiency and creativity to develop engaging user experiences and advance in a professional career. Looking to leverage effective debugging, code optimization, and project collaboration to produce applications that exceed user expectations.

EXPERIENCE

Junior Frontend Developer

02/2022–Present

Freelance

Chicago, Illinois

- Created an SEO-informed WordPress website. Multiple articles rank #1 on the top page on Google.
- Built a Moroccan Darija app as a free resource for others wanting to learn the regional Moroccan Arabic language. Used Tailwind CSS framework and Google Sheets to manually translate and compile over 2,500 terms (and counting). Converted it to a JSON.files so users can get results by searching the term in English or Darija.
- Transformed a Figma restaurant menu design into a responsive webpage using JavaScript, CSS and React, which included developing pages, coding, and debugging.
- Created an online weather app using HTML, CSS, JavaScript, and Rapid API, which included designing the user interface and testing functionality.

Primary School Teacher

09/2018–11/2023

Ministry of National Education

Kénitra, Morocco

- Skilled at analyzing and solving complex educational challenges, transferable to computer science roles.
- Strong communicator, adept at interacting with supervisors, parents, colleagues, and students.
- Quick to embrace new teaching methods and technology to assist in educating the youth.
- Experienced team player adept at collaborating effectively with colleagues, crucial for computer science teamwork.
